

AFIX COLLECTION

Hi5 FURNITURE SUPPORTS YOU FROM DESIGN THROUGH INSTALL

From large to small lecture hall rooms, raise floors to flat, Hi5's expert team will provide specification to installation assistance.

We educate our customers on power and IT requirements, field measurement requirements and offer drawings to specify electrical conduit placement and installation instructions. Hi5 is here to ensure the tables are a perfect fit for your plans.

AFIX CUSTOMIZATION IS STANDARD

Each room is unique so Hi5 helps to bring you ideas to life by facilitating your custom requests. Specify the details to suit their needs. You can request your modesty panels at four inches high or full-length panels that extend to the floor, You can even select the materials from veneer to perforated steel.

We can offer special powder paint colors custom wood matches on PVC edges. We can build just about anything you can dream.

FREESTANDING SEATING VERSES ATTACHED SEATING

Freestanding seating allows almost unlimited options for your fixed-table application. Chairs with casters, four-leg bases, sled bases, and chairs with or without arms are all equally at home with Hi5's aFIX tables. Keeping the seating mobile and moveable provides opportunity for collaboration between people seated in each row and the rows behind them. Freestanding chairs also allow individual freedom to move and adjust the chair as needed for better comfort. In addition, the space between rows in an aFIX installation is larger on average than in a fixed-seating/fixed-table application, providing more space per person and enhanced circulation clearance.
